

Quality Policy

It is the policy of Forward Composites to provide high quality products and design services, which meet all of the customer's requirements, and also meet the requirements of applicable legislation and codes of practice including ISO9001 and AS9100.

Quality is included as a key item in Forward Composite business plans and is thereby linked directly to the success of the business at the highest possible level. Management reviews the performance of the Quality Management System regularly against business objectives and sets revised objectives when necessary.

The key objective is to ensure that all customers are completely satisfied with the products and services they have received from Forward Composites and to establish a best in class position with our customers.

Management has implemented this comprehensive Quality Management System which describes in detail how work is to be done, how work is to be reviewed and measured, and how the quality performance of Forward Composites will be improved.

Compliance with the requirements of this Quality Management System is mandatory on all personnel.

Responsibility for overseeing the implementation of this Quality Management System is delegated to the Quality Manager who is a Senior Manager of the company, and reports directly to the Managing Director.

The Quality Manager has the authority to take any action necessary to ensure compliance with the standards and associated legislation and to liaise with the customers and legislative authorities.

Terence Monaghan
Managing Director
